
Samsung awarded Premier, Inc. contract for General Radiography, Computed Tomography, & Ultrasound

Samsung has been awarded a group purchasing agreement for General Radiography, Computed Tomography, & Ultrasound with Premier, Inc., a leading healthcare improvement company, effective October 1, 2015. The new agreement allows Premier members, at their discretion, to take advantage of special pricing and terms pre-negotiated by Premier for Digital Radiography, CT, & Ultrasound products.

“Samsung is extremely pleased to form this new relationship with Premier, a world-class organization and recognized leader in healthcare improvement. Samsung is making critical investment to help healthcare providers enhance patient care, improve patient satisfaction and increase workflow efficiency with our entire healthcare portfolio. We understand the need to improve healthcare outcomes while lowering costs. We are excited to be a partner with Premier in transforming the provider and patient experience” said Phil Sullivan, Samsung, NeuroLogica Division, President & CEO.

Samsung’s full range of imaging solutions are designed to enhance the quality of care and transform the patient experience. The product portfolio includes [Digital Radiography \(DR\)](#), [Ultrasound](#) and portable [Computed Tomography \(CT\)](#) systems. Samsung is committed to delivering fast, easy and accurate diagnostic solutions for healthcare providers and continually demonstrates to the healthcare community how the combination of Samsung imaging technology, user-inspired design and customer-centric innovation can help enhance the quality of care for patients and unlock workflow efficiencies for hospitals and providers.
