

Sectra wins US enterprise radiation dose monitoring contract

International medical imaging IT and cybersecurity company [Sectra](#) will install its cloud-based, radiation dose monitoring software, [Sectra DoseTrack](#), throughout Memorial Hermann Health System. The software will enable increased patient safety by detecting patients' radiation exposure, ensure compliance with regulatory requirements and standardize all radiation dose data throughout the enterprise.

[Sectra DoseTrack](#) gathers and reports dose data from all sources within the imaging department. Robust analysis capabilities for dose optimization assist in the identification of needed actions such as changing modalities for specific procedures, staff training or imaging protocol revisions. Consideration of patient size and demographics allow for effective organ dose calculations and patient risk assessment.

The multi-year agreement will include dose monitoring services for sixteen hospitals and seventeen imaging centers in the health network. As one of the largest not-for-profit health systems in Southwest Texas, Memorial Hermann provides patient care services throughout the greater Houston area.

About Sectra

Sectra assists hospitals throughout the world to enhance the efficiency of care, and authorities and defense forces in Europe to protect society's most sensitive information. Thereby, Sectra contributes to a healthier and safer society. The company was founded in 1978, has its head office in Linköping, Sweden, with direct sales in 19 countries, and operates through partners worldwide. Sales in the 2017/2018 fiscal year totaled SEK 1,267 million. The Sectra share is quoted on the Nasdaq Stockholm exchange. For more information, visit www.sectra.com

In the medical market, Sectra develops and sells IT solutions for the management and communication of all types of medical images—primarily in radiology, mammography, pathology, cardiology and orthopaedics, as well as other departments where medical images are used. Sectra has a strategic focus on making cancer care more efficient. More than 1,800 hospitals, clinics and imaging centers worldwide use Sectra's systems daily. This makes Sectra one of the world's leading providers of IT solutions for managing medical images and patient information. The company commands a market-leading position in Sweden, Norway, the Netherlands and Portugal, holds a prominent position in the UK and is growing in the US. Sectra has delivered some of the largest installations of medical IT systems worldwide and its systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.
