
The Art of Neurotensin Measurement

In the latest issue of *BioCentury Innovations* [Andreas Bergmann](#), Founder & CEO of sphingotec, and Mark B. Evers, co-author of the recently published Nature paper “An obligatory role for neurotensin in high-fat-diet-induced obesity”, share their opinion on the role of neurotensin as prognostic marker for obesity, the future relevance of neurotensin measurements for the prevention of obesity and the art of measuring this fragile hormone.
