
US Regional Health selects Sectra as its enterprise PACS vendor

International medical imaging IT and cybersecurity company [Sectra](#) will install its radiology and cardiology PACS throughout South Dakota-based Regional Health. The Sectra solution, integrated with the Epic EMR, will ensure high system availability and reliability throughout the five hospital, twenty-five clinic organization.

“Nearly one year ago, Regional Health launched Epic, an electronic medical record system, but soon realized we needed to replace our outdated PACS with similarly matched, state of the art technology that could carry us into the future. Sectra was the vendor we determined would be our best partner,” says Stephanie Lahr, MD, Chief Information Officer. “We are committed to making a difference every day, and advanced technologies in the hands of our skilled providers is one way we will do that.”

Sectra’s enterprise imaging solution provides a unified strategy for high production environments and will support Regional Health’s delivery network of 20 communities across two states and 32 specialty areas of medicine towards the goal of shortened report turnaround times, enhanced result distribution workflows, and improved communication between radiology, cardiology and referring departments.

In addition to [Sectra PACS](#) for diagnostic radiology and cardiology, the contract signed in September includes 3D advanced visualization tools, [Sectra Breast Imaging PACS](#) for mammography workflow, [teaching file software](#) and Sectra’s universal image viewer.

Experience the solutions at RSNA 2018

Sectra’s solutions for enterprise imaging will be showcased at RSNA in booth #6113. [Read more and book a meeting with Sectra at RSNA](#) .

About Sectra

Sectra assists hospitals throughout the world to enhance the efficiency of care, and authorities and defense forces in Europe to protect society’s most sensitive information. Thereby, Sectra contributes to a healthier and safer society. The company was founded in 1978, has its head office in Linköping, Sweden, with direct sales in 19 countries, and operates through partners worldwide. Sales in the 2017/2018 fiscal year totaled SEK 1,267 million. The Sectra share is quoted on the Nasdaq Stockholm exchange. For more information, visit www.sectra.com

In the medical market, Sectra develops and sells IT solutions for the management and communication of all types of medical images—primarily in radiology, mammography, pathology, cardiology and orthopaedics, as well as other departments where medical images are used. Sectra has a strategic focus on making cancer care more efficient. More than 1,800 hospitals, clinics and imaging centers worldwide use Sectra’s systems daily. This makes Sectra one of the world’s leading providers of IT solutions for managing medical images and patient information. The company commands a market-leading position in Sweden, Norway, the Netherlands and Portugal, holds a prominent position in the UK and is growing in the US. Sectra has delivered some of the largest installations of medical IT systems worldwide and its systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.
